

What should be the purpose of voting?

Who do I vote for?

What is my message, and my expectations, from the person who wants my vote?

We are willing to vote for you and support you by any means. If:

- You promise to be for the people and constitution, not power, lobby, and manipulation of the power
- If you stand for justice – internally and externally
- If you guarantee equality for all regardless of race, color, religion, and gender
- If you commit to spread harmony, peace and justice for all – internally and externally
- If you are going to support the poor, needy, weak, and oppressed
- If you stop the arrogant display of power, weapons and aggression. It never has, and never will elevate any nation; instead it causes hate and wastes money and resources which can be used for good causes
- If you promise to develop the infrastructure, the healthcare, the economy and resources to uplift the forgotten of society

I bear witness to God, unless we make a quick turn and focus on these ethical guidelines, we are headed for our downfall. We will cause our destruction by our own hands, through our oppression, bullying, supporting aggressors, and spending unfathomable amount of money on weapons of mass destruction.

History repeats itself. No nation or civilization can govern and leave a legacy with the power of weapons, aggression, wars, and injustice.

History celebrates those who:

- uphold justice, humanity, peace, welfare of the weakest
- those who alleviate the suffering of others, not those who inflict suffering
- save lives, not kill
- heal wounds, not inflict them
- spread cure for illnesses, not spread diseases and virus

We are at a crossroads of a very delicate and dangerous time in history. And the choice of which road to take belongs to us.

If you can't commit to the above-mentioned ethical demands, you will never have my vote or my support.

Signed,

A Muslim American
